

Executive Committee post: Website manager

Candidate: Mike Valentine

Personal statement

For the past year I have occasionally worked with Malcolm Torry and Amanda Wray on the BIEN website, helping with minor tasks to transition to the latest version of the website.

Website management with the WordPress content management system requires regular updates to core software and of active plug-ins and tools to keep the website secure and reliably functioning.

Maintaining connections to social media for effective community engagement and to analytics tools to monitor the health of the website are critical. I'd be honored to be entrusted with these important tasks.

It would be a privilege to serve BIEN as Website Manager, and I look forward to serving if elected to do so.
